Question3 -
Question4 -
Question5 -
Question6 - My Doctor has prescribed several patented (non-compounding) drugs. Having difficulty with toxic reaction to four different prescriptions. Since using the compounded natural form of medication I now find it has improved my general health, having no allergic effects I had with the patented prescriptions. In its present form the M.O.U. as well as the compounding section 503A of the modernization act severely restricts the rights of Physicians and patients to obtain health care products from their provider of choice, and infringes on the rights of compounding pharmacists to serve the public medical needs.

I strongly urge you to amend M.O.U.
